**On Day-2, Dr. K Murali**, started his session with 5G devices and their challenges. He explained about Frequency Bands, Huge Data Volume, MIMO Technology, Beam forming, Device to Device Communication, Ultra low Latency Service, Ultra Reliability Network, Security and Privacy and Smart Automobile. He also explained about antenna design and simulation.

**On Day-3, Dr. K Murali**, started his session with MIMO. He Said that Complex MIMO antenna arrays will be used to deliver high speed data to individual users. The idea of MIMO is to increase number of transmitting antenna at the base station and mobile device (UE) to maximize the data transfer by simultaneously sending and receiving. He also said that, MIMO technology requires complex algorithms and device capability at both base station and user equipment. He also said that, mm-wave and it's role in5G.

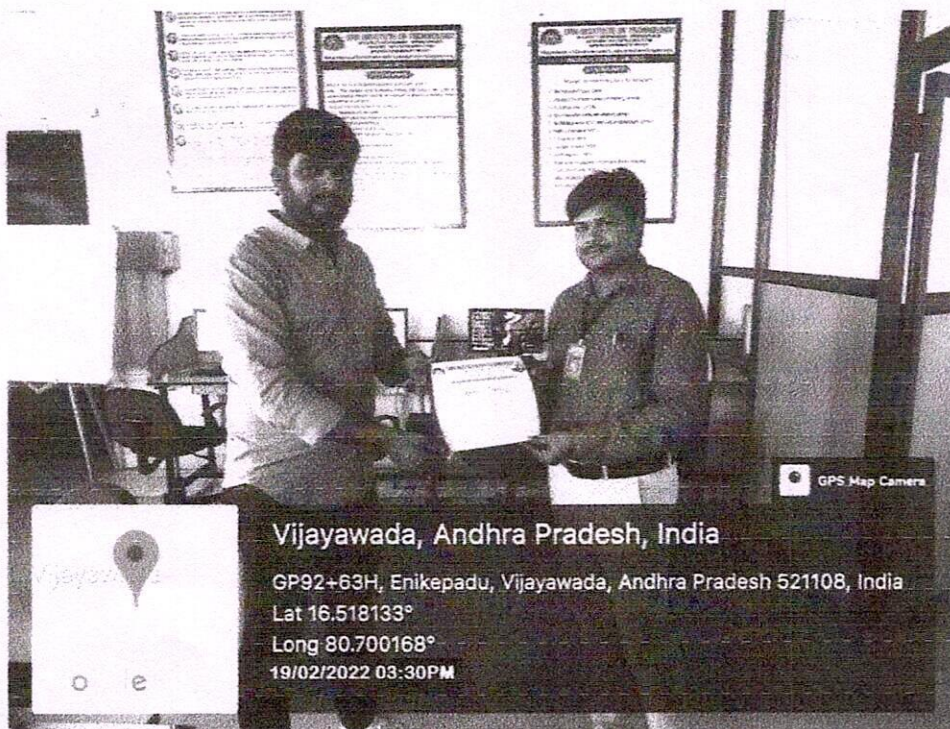

**On Day-4, Dr. K Murali**, started his session by introducing 5G wireless communication and optical wireless communication, and the differences between 5G wireless communication and optical wireless communication.

On Day-5, **Dr. K Murali**, started his session by Introduction Generalized Frequency Division Multiplexing (GFDM). He said that, GFDM is based on traditional filter bank multi-branch multi- carrier concepts which are now implemented digitally. He also said that GFDM approach exhibits some attractive features which are of particular importance for scenarios exhibiting high degrees of spectrum fragmentation.

On Day-6, **Dr. K Murali**, started his session by introducing 5G in Medical Scenario. He told number of applications like Remote patient monitoring, Connected ambulance, HD virtual consultations, Video-enabled prescription management, AR/VR assistance for the blind, Distraction and rehabilitation therapy, Remote expert for collaboration in surgery, and AR/VR training and education. **PATENT**

- A patent is an exclusive right granted for an invention, which is a product or a process that provides, in general, a new way of doing something, or offers a new technical solution to a problem. To get a patent, technical information about the invention must be disclosed to the public in a patent application.

The screenshot shows a Zoom meeting interface with a central slide titled "PATENT". The slide contains a definition of a patent. The top of the meeting window shows participant initials: MK, PL, RC, RK, BY, and U. On the right, a list of participants is visible, including names like S. SANKAR, Anitha, and others.

**Claims**

- Claims define the contours of rights, if and when a patent is granted for an invention. Hence, claims are the most critical part of a Patent Application.
- In a complete specification the description is followed by claims. Since, claims define the scope of legal protection, it is suggested that they should be drafted carefully to cover all the aspects of the protection being sought at the same time adequately distinguishing the prior art from the claimed invention.
- No exclusivity is obtained for any matter described in the Complete Specification unless it is claimed in the claims. What is not claimed in the 'claims' stands disclaimed, and is open to public use, even if the matter is disclosed in the description.

The screenshot shows a Zoom meeting interface with a central slide titled "Claims". The slide contains three bullet points explaining the nature and drafting of patent claims. The top of the meeting window shows participant initials: RC, RK, PL, RK, BY, and U. On the right, a list of participants is visible, including names like S. SANKAR, Anitha, and others.

**Objects / Objectives of the Invention**

- The purpose of this part is to clearly bring out the necessity of the invention. It shall clearly mention the technical problems associated with the existing technology and the solution for that, bringing out the differences between the claimed invention and the prior art.
- The solution sought by the invention should be clearly brought out as object(s) of inventions with statements like "It has already been proposed ....." followed by the objects which the inventions has in view e.g. "The principal object of this invention is .....", "Another object of this invention is .....", "A further object of this invention is ....." etc.

**COPYRIGHT II**

Copyright is a right given by the law to creators of literary, dramatic, musical and artistic works and producers of cinematograph films and sound recordings.

In fact, it is a bundle of rights including, inter alia, rights of reproduction, communication to the public, adaptation and translation of the work.

“Research Aspects of Machine Learning”**

**Date: 26-06-2022 to 30-06-2022**

**Timings: 10.00 A.M – 12.00 P.M**

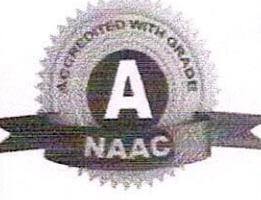

**No of Participants: 60**

A Five Day Online Faculty Development Program on “Research Aspects of Machine Learning” was organized by SRKIT using Microsoft Teams from 26<sup>th</sup> June to 30<sup>th</sup> June, 2022. A very beneficial academic environment was experienced by the participants during the program. There were **60 participants** from different Colleges.

The dignitaries were welcomed by **E. NAGARAJU** Asst. Prof, MCA, SRKIT. The keynote address for the FDP was given by **Dr B. Asha Latha**, Associate Professor, Head of Department CSE, SRKIT which was followed by an introduction to the program by **Dr. B. Tirumala Rao** Assistant Professor, UCEV and he also briefed about the foundation for Machine Learning. He started the technical session with the fundamentals and Research Scope in Machine Learning. This was followed by a practical session.

The Third and Fourth Day of the program started by **Dr. D. Sravana Priya**, Associate Professor, SRKIT. She focused on the Classifiers used in Machine Learning like Naive Bayes Classifier, Decision Tree, K-nearest neighbor, Support Vector Machine, Logistic Regression. This was followed by Hands on session using Google Colab.

The Fifth Day of the program started off with the discussion on Use of Natural Language Processing (NLP) in Machine Learning and insights of Recurrent Neural Network Concepts by **Dr. K. V. Kadambari**, Assistant Professor, NITW. This was followed by Hands on session using Google Colab. She focused on the importance of NLP in Machine Learning.

The program was enlightening for the participants and the practical session helped them to understand about the Research Scope in Machine Learning. Dr. B. Asha Latha, Assoc. Prof, CSE, SRKIT presented the Vote Of Thanks for the Program.

Below are the glimpses of the Faculty Development Program:

The image shows a presentation slide with a dark background. At the top left is the SRK Institute of Technology logo and name. At the top right is the NAAC Accredited with Grade A logo. The main title is "Research Aspects of Machine Learning" in a large, light-colored font. Below the title, it says "A FIVE DAY ONLINE FACULTY DEVELOPMNET PROGRAM". On the right side of the slide, there is a vertical column of circular icons containing the letters: DP, NE, DA, DD, VB, PU, KB, KR, JA, LL, RM, DN, D, AA, SB, and S. There is also a small icon of a person next to the JA icon.

## Generalization & Train / Test splits

- Given a loss function, we can then attempt to find the function  $h$  that minimizes the loss:

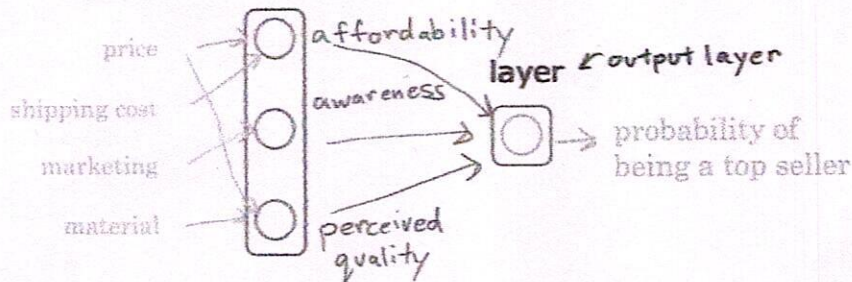

$$h = \underset{h}{\operatorname{argmin}} \mathcal{L}(h)$$

- A big part of machine learning focuses on how to do this minimization efficiently.
- To resolve the overfitting issue, we usually split  $D$  into three subsets,  $D_{TR}$  as the training data,  $D_{VA}$  as the validation set, and  $D_{TE}$  as the test set.
