The Resource Person is **V Govinda Rao**, Managing Director, Microlink Peripherals Pvt. Ltd. They have organized workshops on continuous basis to enhance student's practical & technical skill and to make them compatible with industry.

The workshop was aimed to provide knowledge about Complete PCB Designing using simulation tool to test electronics & electrical circuit in software environment and also its Fabrication, PCB design software named PCB Wizard & to make physical PCB at home so that any student can make project on his own. Almost 47 students from ECE-A have participated in the workshop.

No. of Participants: 47

Following content are covered in workshop:

- ✓ PCB Design & Routing
- ✓ Schematic Design
- ✓ Component Footprint Design
- ✓ Integrated Library Design
- ✓ Etching of PCB
- ✓ Soldering of Components on to PCB.

The duration of this workshop was two days, with seven hour session each day in a total of fourteen hours properly divided into different hands on sessions. The entire participants were divided into two batches of 25 students each and parallel both the software and hardware sessions were conducted on both the days.

On 23<sup>rd</sup> July, 2021 the first session of expert talk by Mr. V Govinda Rao started at 10:00A.M. They started with introduction of PCB Designing, Benefits of the workshop and its applications.

They explained Schematic Design of Circuit & terms related to PCB i.e.,

- ✓ Copper Clad – Raw material of PCB formed by sticking a thin layer of copper conductive coil on the non conductive material.
- ✓ Art Work – Process of preparing different layouts for PCB manufacturing.
  1. Component side Art Work
  2. Solder side Art Work.

## PROGRAM REPORT

Date: 21-06-2021

- Title of the Program:** An Online Seminar on "FAECAL SLUDGE & SEPTAGE MANAGEMENT- AN APPROACH FOR SAFER ENVIRONMENTAL SANITATION"
- Resource person :** Sri Uday Singh Gautam, State Program Manager & Sanitation Expert, ASCI stationed at Vijayawada, Andhra Pradesh. Ph.no.9849333311.
- Guests:** Dr. Malini Reddy & Dr. Priyanka Reddy  
Members of ASCI, Hyderabad
- Duration :** 2hours (11:00AM to 01:00PM)
- No. of Participants :** 124
- Organized by:** Department of Civil Engineering, SRKIT.
- Collaboration:** Conducted in association with Administrative Staff College of India, Hyderabad (ASCE) as a part of the MoU signed with the Institute.
- Description :** Sanitation in India is a key to achieving improved public health and enhanced socio-economic outcomes. To achieve this objective, Ministry of Urban Development has launched two key schemes namely, Swachh Bharat Mission (SBM) and Atal Mission for Rejuvenation & Urban Transformation (AMRUT). While SBM aims to end open defecation by universalizing construction and use of toilets, AMRUT is aimed at strengthening the sewerage and water supply network of the country. Both schemes aim to holistically address the existing gaps under the sanitation value chain in India.
- At present, the penetration of sewerage systems is low in the country and more than 45% of urban Indian households are dependent on On-Site Sanitation (OSS) systems. Thus, till the time the Government's vision of 100% sewerage universalization is

achieved, it is felt that faecal sludge output needs to be managed in an environmentally safe and sustainable manner using complementary and alternative methods of treatment. In view of this, the Ministry of Urban Development is launching the National Policy on Faecal Sludge and Septage Management (FSSM) to facilitate nationwide implementation of FSSM in India.

**Main Objective:** To impart knowledge on all the important aspects of Faecal Sludge for the design and operation of a comprehensive FSSM system.

**Broad Objectives:**

1. To ensure that all benefits of wide access to safe sanitation accrue to all citizens across the sanitation value chain with containment, extraction, transportation, treatment, and disposal / re-use of all faecal sludge, septage and other liquid waste and their by-products and end-products.
2. To promote access for households to safe faecal sludge and septage management facilities (including proper disposal arrangements).
3. Suggest and identify ways and means, including the methods and resources, towards creation of an enabling environment for realising safe and sustainable FSSM in India.

**Content covered by the Resource Person:**

- ✓ Design of septic tanks, pits etc. (adapted to local conditions), including siting, and methods of approval of building plans, or retro-fitting existing installations to comply with rules and byelaws.
- ✓ Delineation of private (individual houses, groups housing, institutions etc.) and public responsibilities (urban local bodies and other local authorities) in relation of faecal sludge and septage management.
- ✓ Details of the planning and implementation process for carrying out safe and sustainable management of all faecal sludge and septage. This may be integrated with overall city land use planning, with the timelines for holistically addressing waste water management via on-site, decentralised or centralised systems.
- ✓ Special provisions for medium and large format real estate developments.
- ✓ Frequency of desludging, and O&M of installations and the responsibilities of householders (owner/occupant).

- ✓ Operating procedures for desludging including safety procedures with an emphasis on the safety, health and dignity of sanitation workers.
- ✓ Licensing, record-keeping, monitoring and reporting arrangements for faecal sludge and septage service providers.
- ✓ Methods and locations of transport (conveyance), treatment and safe disposal.
- ✓ Tariffs or cess/tax etc. for septage management in the city. Penalty clauses for untreated discharge for households as well as desludging agents and unsafe emptying and handling of faecal waste.
- ✓ Regular monitoring and evaluation of the entire process of FSSM.
- ✓ Training, accreditation, education and awareness programs.

## Introduction:

Git is a free and open source distributed version control system designed to handle everything from small to very large projects with speed and efficiency. Git is easy to learn and has a tiny footprint with lightning fast performance. It outclasses SCM (Software Code Management) tools like Subversion, CVS, Perforce, and ClearCase with features like cheap local branching, convenient staging areas, and multiple workflows.

GitHub is an American company that provides hosting for software development version control using Git. It is a subsidiary of Microsoft, which acquired the company in 2018. It offers all of the distributed version control and source code management (SCM) functionality of Git as well as adding its own features. It provides access control and several collaboration features such as bug tracking, feature requests, task management, and wikis for every project.

Software Documentation / Technical Documentation is an important task during the product development so that the users need not to worry about how to use your product. From a very small project to a project with a huge number of developers, technical documentation writing is easy by using ReadTheDocs and Sphinx tools.

**Introduction:**

Git is a free and open source distributed version control system designed to handle everything from small to very large projects with speed and efficiency. Git is easy to learn and has a tiny footprint with lightning fast performance. It outclasses SCM (Software Code Management) tools like Subversion, CVS, Perforce, and ClearCase with features like cheap local branching, convenient staging areas, and multiple workflows.

GitHub is an American company that provides hosting for software development version control using Git. It is a subsidiary of Microsoft, which acquired the company in 2018. It offers all of the distributed version control and source code management (SCM) functionality of Git as well as adding its own features. It provides access control and several collaboration features such as bug tracking, feature requests, task management, and wikis for every project.

Software Documentation / Technical Documentation is an important task during the product development so that the users need not to worry about how to use your product. From a very small project to a project with a huge number of developers, technical documentation writing is easy by using ReadTheDocs and Sphinx tools.
